

STURDY RECYCONES

The RECYCONE is a domestic waste composter that gives you a small supply of rich, sweet smelling compost to use in the garden or for house plants.

WHY COMPOST?

Composting is the ideal way to reduce the amount of kitchen waste you throw away. Due to new waste disposal costs, where the person will pay per weight of waste, the Sturdy Recycone will help reduce these costs. Compost is also a natural way of providing plants with the nutrients it needs rather than using chemical fertilizers. Composting also helps to conserve natural habitats for future generations.

WHAT TO COMPOST?

- Fruit
- Vegetable peelings
- Tea bags
- Leaves
- Eggshells
- Some grass-cuttings
- Paper & Cardboard
- Human & Pet hair
- Vacuum Cleaner bag contents

WHAT NOT TO COMPOST?

- Anything inorganic (Plastic, Metal, etc.)
- Meat, Bones
- Dairy Products
- Cooked Food
- Oil
- Pesticides

224 RECYCONE

325 RECYCONE

527 RECYCONE

- ♻️ Manufactured from 100% UV stabilised recycled plastic.
- ♻️ Available in three sizes 224, 325 & 527.
- ♻️ Large lid for insertion of waste.
- ♻️ Unique hatch for extraction of compost.

- ♻️ Also available - 10 litre Kitchen Kaddy.
- ♻️ Specially designed ribs to help accelerate decomposition of material.
- ♻️ Allows for fast, efficient and cleaner composting.

STURDY RECYCONES

STURDY RECYCONE

As the heat from the sun speeds up the process you will find that during the winter your RECYCONE slows down a little, but don't worry, it has been designed to cope with the amount of waste from a busy family home. In the summer months you can help the RECYCONE by removing the compost from the base using the opening provided. The opening is normally covered by the bottom hatch, this is opened to expose the access hopening. By removing the compost you allow the new material above to drop down, aerating the RECYCONE and helping it to work. This should only need to be done twice a year, even for the busiest RECYCONE.

WHERE DOES COMPOSTING FIT INTO RECYCLING

The chart on this page illustrates the make up of an average Irish dustbin. Many of the sections shown are familiar recyclable items and recycling containers for them are common, but the largest section in this section is kitchen waste and this is the area your RECYCONE can help with. By using the RECYCONE the Local Authority will have to collect less waste from your area, reducing costs to provide the service, needing fewer rubbish tips and helping to reduce the damage to the atmosphere.

YOUR STURDY RECYCONE AND THE WORLD

The benefits of using your RECYCONE does not stop at home. Though you will soon find that the compost is useful and that your dustbin no longer has that familiar "dustbin pong" the biggest benefits will be felt by you outside the house.

Your RECYCONE is not the whole answer to the problems our modern life gives our planet, but it is an important part. The waste the RECYCONE digests would otherwise be buried in rubbish dumps, making them homes to rats, causing dangerous gases and building up problems for future generations to have to deal with. With a little help from us nature can help herself and the process of composting in one of nature's most powerful weapons in the fight to keep our world habitable.

INSTRUCTIONS

1. - Use Recycone to mark site.
2. - Remove topsoil.
3. - Place Recycone in trench.
4. - Your Recycone is ready to use.

DIMENSIONS (in mm's)

224 - Height 1130, Top Ø - 410, Bottom Ø-720 (290lt)

325 - Height 900, Top Ø - 530, Bottom Ø - 840 (335lt)

527 - Height 1130, Top Ø - 530, Bottom Ø - 840 (420lt)

AVERAGE IRISH DUSTBIN CONTENTS

Kitchen	30 %
Paper	25%
Glass	10%
Dust & Ash	10%
Plastics	10%
Metals	7%
Unclassified	7%
Textiles	3%
