

STURDY FARM EQUIPMENT

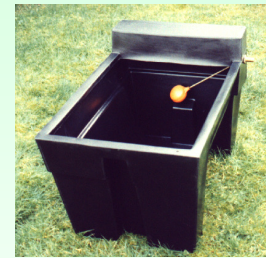

The Sturdy Drink Troughs are ideal for all sizes of livestock herds. The larger capacity troughs allow for water access to two herds at one time by placing them across field boundaries. The smaller sizes are suitable for small herds, sheds or single animal use.

- The Sturdy Drinking Troughs are strong & resistant to abuse from cattle and also lightweight with side grips to help while carrying.
- All Troughs have a low drinking height so animals can reach the water easily and they have a smooth interior to allow for easy cleaning.
- A ballcock and valve on all drinking troughs are well protected and serviceable.
- They are designed with well rounded edges that ensure animal safety.
- The 280 Gallon Trough comes complete with a coated steel protector frame to prevent animals from entering the unit.
- The 4 Gallon Trough comes complete with a coated steel fixing frame to allow for wall mounting.
