# STURDY GRANDE

LAMB CREEP FEEDER

The Grande Lamb Creep Feeder is Sturdy's latest addition to the sheep feeding market in Ireland and UK. The feeder is designed to be strong and robust for use in agricultural environments. The Lamb Feeder is easy to manoeuvre and is suitable for indoor or outdoor use.

The capacity of the Creep Feeder is 125kg which is one of its main features. The large lid opening allows for greater access when filling the unit with nuts or meal.

The Creep Feeder allows the lambs to access the feed at the same time, while preventing the ewes from feeding. The design of the product allows for the feed, which is stored in a central column, to slowly creep to the perimeter of the feeder thus allowing lamb access.

### Feed Trough

**Dimensions:** Height 160mm  
Width 350mm  
Length 2000mm

**Feeds:** 12 sheep

**Code:** 337 - A

The 4 wheeled product is designed to be strong and robust for use in harsh agricultural environments.

Using their teeth, sheep can rotate the rubberised wheels which in turn draws the molasses up from inside the unit.

One feeder full of molasses is suitable for servicing a flock of up to 200 sheep for over a week.

The large fill point allows for easy filling and the lid is lockable by means of a standard padlock. The feeder also comes with lifting hooks for easy of placement.

# FODDER BELL

The STURDY FODDER BELL is designed to help keep fodder dry while out in an open field.

The Fodder Bell can be fixed to the ground with large pegs driven into the ground, this keeps the product from being moved around.

The Fodder Bell can be used for horses, cattle or sheep. The sides of the product are flexible enough to allow animals push further into the feeder.

The size of the product accommodates one circular fodder bale or a fodder stack. The feed is contained within the product so it is not spread around the field. The Fodder Bell can be moved around the field occasionally so the ground is not ruined in one area.

There are 10 feeding stations for the sheep model, and 4 for the horse model, with a lifting eye on the top for ease of placement. The number of feeding stations can change at your request.

If you would like further information, brochures or a quote please do not hesitate to contact us.

<b>Fodder Bell</b>	
<b>Dimensions:</b>	Diameter 1900mm Height 1675 mm
<b>Code:</b>	<b>558 - A</b>

# Feed Tidy

The Feed Tidy is designed to be used with minimum amount of effort. The spike and fork pick-up allows the user to pick up the Feed Tidy without attachments and get to work. With its sweeping action from the HDPE panels underneath, your feed area will be cleaned with just one pass saving you time.

- UV Stabilised MDPE body
- Galvanised steel Sub Assembly
- M14 lock nuts for security
- Approx. 43kgs Weight (Including Fittings)
- Ribs Incorporated for strength
- Long life Expectancy
- Quick Pick-Up/Put-Down
- No attachment required
- UV and Frost Resistant
- Groves to grip feed
- Channels for water drainage

## STURDY Tipping Wheelbarrow

Designed for agricultural and equestrian use, the STURDY Tipping Wheelbarrow can be used anywhere to transport large amounts of material.

The wheelbarrow is balanced perfectly so even when fully loaded it is easy to lift and simple to tip.

Comes complete with plastic handles and a galvanised steel frame.

Two pumped wheels allow for ease of movement.

The smooth interior allows the wheelbarrow to be cleaned with ease.

As an optional extra, each wheelbarrow can be personalised with signage or manufactured in a particular colour to your specification.

### Tipping Wheel Barrow

## STURDY Equi-Wash

The STURDY Equi - Wash contains power, pump and water all housed in one slim product. It allows the user to conveniently wash down horses without the need for a generator, buckets or large water tanks.

The portable power wash unit contains 100lt's of water, enough for cleaning down 3 horses.

The unit comes complete with a 5 meter hose and wash nozzle.

The Equi - Wash is fitted with a timer that shuts the unit off preventing pump burn out.

The product is powered by a 120Volt battery, complete with charger.

A fixing kit is also provided to attach the unit to a trailer.
