INTRODUCING THE

# STURDY GARDEN *Buddy*

This 850L Water Storage Tank is ideal for collecting rainwater specifically for watering your garden.

The rainwater is collected through a Downpipe Filter which directs it into the storage tank. The filter also acts as an overflow once the tank becomes full.

The tank is fitted with a 230V (13A) Submersible Pump which includes a float switch as standard. The float switch only allows the pump to operate when water is available. The pump comes with a 10m cable which plugs directly into a standard household socket.

It is also possible to fill a watering can through a tap located on the front of the tank.

The rectangular shape of the tank allows it to fit neatly into corners or against walls, causing you the minimum amount of intrusion.

The tank is fitted with a bracket to allow for neat storage of the garden hose when its not in use.

The 8" Lid on top of the tank allows you to inspect the inside of the tank if required. It is recommended that the tank be cleaned out periodically to help prevent any sediment build up.

Submersible Pump

\*15 Meter Garden Hose Included

#### Technical Specifications:

Capacity:  
850L

Width:  
675mm

Length:  
1000mm

Height:  
1610mm

Code:  
519-A

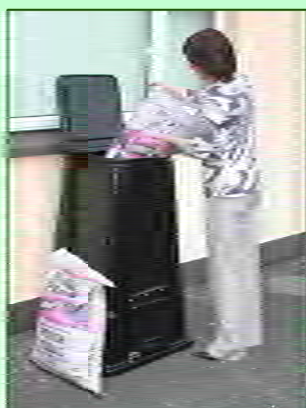

# Fuel Storage Range

## PRODUCT FEATURES:

- STURDY Fuel Bunkers are durable, long lasting and maintenance free.
- All bunkers are suitable for the storage of coal, turf, briquettes and wood and now all models come complete with lockable lids.
- Bunkers come in black as standard but other colours are available upon request.
- The large lid openings on each of the bunkers make them extremely easy to fill.
- The weather resistant units are manufactured from medium density polyethylene with ultra violet light stabiliser that prevents discolouration.

### Upright Fuel Bunker - (3 Bag)

Ideal for locations where space saving is a factor for those who occasionally use an open fire.

#### Technical Specifications:

Capacity  
150kg (3 Bag)

Width  
650mm

Depth  
650mm

Height  
1060mm

Product Code  
062 - A

### 150kg Fuel Bunker - (3 Bag)

The STURDY 3CWT Fuel Bunker is ideal for the person who occasionally uses an open fire.

#### Technical Specifications:

Capacity  
150kg (3 Bag)

Width  
635mm

Depth  
780mm

Height  
800mm

Product Code  
327 - A

### 250kg Fuel Bunker - (6 Bag)

The STURDY 5CWT Fuel Bunker is ideal for the person who uses an open fire on a daily basis.

#### Technical Specifications:

Capacity  
250kg (6 Bag)

Width  
840mm

Depth  
960mm

Height  
800mm

Product Code  
099 - A

### 500kg Fuel Bunker - (12 Bag)

The 10CWT Fuel Bunker is ideal for the person who uses an open fire as their main heating source.

#### Technical Specifications:

Capacity  
500kg (12 Bag)

Width  
1000mm

Depth  
1140mm

Height  
1050mm

Product Code  
100 - A

### Briquette Bunker

Ideal for the storage of briquettes and fuels, the Sturdy Briquette Bunker can be used both indoor & outdoor.

#### Technical Specifications:

Capacity  
4 Bales of Briquettes

Width

Height  
630mm

Product Code  
411 - A

### Tidy Bunker

The STURDY Tidy Fuel Bunker is ideal for the person who occasionally uses an open fire.

#### Technical Specifications:

Capacity  
150kg (3 Bag)

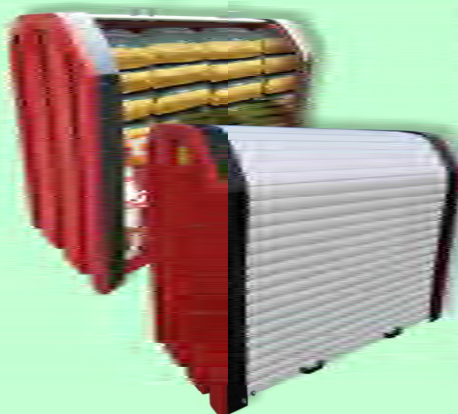

Width  
800mm

Depth  
780mm

Height  
780mm

Product Code  
482 - A

## Sturdy Midi Store

### Technical Specifications:

Capacity  
1.5m<sup>3</sup>

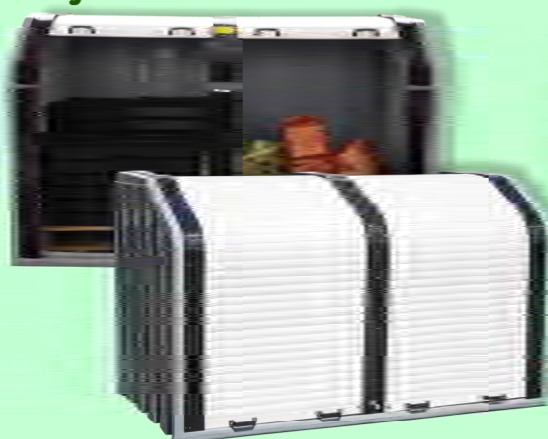

Width  
1,650mm

Depth  
810mm

Height  
1,200mm

Product Code  
538-A

## Tidystore Plus

### Technical Specifications:

Capacity  
2.6m<sup>3</sup>

Width  
2,100mm

Depth  
1100mm

Height  
1,220mm

Code: 479 - A  
Shelf: 536-A

The roller shutter door range of Mini Bunker, Sturdy Midi Store and the Tidystore Plus are ideal for storage and display in both domestic and business use. It is perfect for the storage of a combination of coal, turf, wood or briquette storage.

The unique design incorporates a roller shutter door which allows easy access to the unit both for loading and unloading.

The rotationally moulded UV stabilised units guarantees a strong and durable weather resistant unit. They are long lasting and maintenance free.

They comes in black as standard but other colours are available on request. The unit can be customised to your corporate colours.

Capacity  
0.8m<sup>3</sup>

Width  
1070mm

Depth  
1060mm

Height  
910mm

Product Code  
329 - A

## Small Log Box

The unit is robust and is designed to endure constant use during winter months. It has a wide aperture to allow for ease of filling and for the extraction of logs, briquettes or turf.

### Technical Specifications:

Capacity  
175L

Width  
985mm

Depth  
595mm

Height  
620mm

Product Code  
410 - B

## Large Log Box

The unit has a wide aperture to allow for ease of filling and for the extraction of logs, briquettes or turf.

### Technical Specifications:

Capacity  
400L

Width  
800mm

Length  
1200mm

Height  
840mm

Product Code  
495 - B

# Tipping Wheelbarrow

## Technical Specifications:

Capacity  
310L

Width  
1020mm

Length  
1870mm

Height  
850mm

Product Code  
338-A

1. Wheelbarrow is balanced so it is easy to manoeuvre even when fully loaded.

2. Lift handles of barrow until the bucket tilts forward away from the frame.

3. Bring frame back towards the ground and the bucket will tilt forward fully, emptying contents.

## Wheelie Bins
